PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, 2026) with hands-on experience in full-stack web development, Python backend engineering, and machine learning. Skilled in Python, JavaScript, React, Flask, FastAPI, PostgreSQL, MongoDB, and Docker, with a track record of building RESTful APIs, deploying scalable backend systems, and developing PyTorch-based ML models. Completed two internships delivering production-level features in Agile team environments. Seeking a Software Engineer or Full-Stack Developer role.

EDUCATION

Jaypee University of Information Technology, Solan

2022 – 2026

Bachelor of Technology – Computer Science Engineering

INTERNSHIP EXPERIENCE

Oppexl Technologies LLP

Dec 2025 – May 2026

Full-Stack Python Developer Intern | Product Development Division | 6 months

- Built and integrated RESTful APIs and reusable frontend components for a Unified Web Application serving internal and external stakeholders, improving UX consistency and load performance.
- Developed Python (Flask) modules for data processing, file handling, and workflow automation using OOP principles; wrote unit tests to reduce cross-browser bug recurrence.
- Contributed across full Agile development cycles including sprint planning, code reviews, testing, and technical documentation within a cross-functional team.

Whale Cloud Technology India Pvt. Ltd.

Jun 2025 – Jul 2025

Web Development Intern

- Contributed to front-end and back-end development projects using HTML, CSS, and JavaScript to build and maintain web application features.
- Delivered assigned tasks across the full development lifecycle, demonstrating proficiency in client-side and server-side technologies in a professional team environment.

PROJECTS

Semi-Supervised Learning for Disaster Damage Assessment

May 2026

Python, PyTorch, TensorFlow/Keras, OpenCV, Vision Transformer (ViT)

- Developed a ViT-based semi-supervised model for post-disaster building damage assessment on the xBD Dataset using an EMA Teacher-Student framework, pseudo-labeling, and consistency regularization.
- Built a 4-class damage classifier (No Damage, Minor, Major, Destroyed) from satellite imagery and integrated Grad-CAM for model interpretability.

Full-Stack E-Commerce Platform (Blinkit Clone)

Dec 2025

React, Node.js, Express.js, MongoDB, JWT, REST APIs

- Developed a full-stack e-commerce application with JWT authentication, OTP verification, and dynamic management of 50+ product listings with search and filtering.
- Implemented cart, admin panel, and order workflow modules, improving user interaction flow and system responsiveness.

AI-Based Resume Screening Bot

Jul 2025

Python, FastAPI, PostgreSQL, Docker, REST APIs

- Built a scalable FastAPI backend to process and analyze 100+ PDF resumes, designing 6+ RESTful API endpoints for efficient data flow.
- Integrated PostgreSQL for structured data storage and optimized query performance by 25%, ensuring low-latency responses and system scalability.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, SQL

Web Technologies: HTML, CSS, React, Node.js, Flask, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Frameworks & Libraries: PyTorch, FastAPI, OpenCV, TensorFlow/Keras

Tools & Platforms: Git, GitHub, Docker, Postman, GitHub Copilot, Linux

AI / ML: Semi-Supervised Learning, Vision Transformers (ViT), Grad-CAM, Pseudo-Labeling, Machine Learning

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems

CERTIFICATIONS

- Introduction to Cloud Computing – Infosys Springboard
- Machine Learning Foundation Certification – Infosys Springboard
- Explore Machine Learning using Python – Infosys Springboard
